

CELEBRITY SOCIETY

FEB~MAR 2007

ESTABLISHED IN 1970

Famed water & glass sculptor Richard Bilow generously lent his talents to this year's showcase. Mr. Bilow is responsible for some of the best public art installations in Los Angeles. His sculptural glass compositions of organic sea shapes have an ethereal quality simply not found in other mediums. You have seen his work (which sometimes incorporates proprietary electronic mixed media technology) in the tanks of Granita in Malibu, Beverly Hills City Hall, and some of the finest homes in the world. Richard's installation in Allegra's grotto was transcendent. Framed in muted teal stone casework of Barbara's design and set against a wall of shimmering Maya Romanoff's mother-of-pearl the entire room was a feast for the senses.
